# Creating Term-Based Subjects & Classes for Senior High School

A step-by-step user manual for the **Senior High School Head** — how to set up subjects and classes for the 1st, 2nd, and 3rd Term.

**For: SHS Department Head**

# 1 · What changed & why

Senior High is now **term-based**. Unlike Elementary/JHS (where subjects run the whole year), SHS subjects and classes **change every Term**. This guide shows you how to create them.

## The key idea — one Term = one Semester

When you create an SHS subject or class you choose a **Semester**. That Semester **is** the Term:

| IF YOU WANT THE SUBJECT/CLASS IN... | CHOOSE SEMESTER | IT SHOWS DURING     |
|-------------------------------------|-----------------|---------------------|
| 1st Term                            | <b>1st</b>      | First Term grading  |
| 2nd Term                            | <b>2nd</b>      | Second Term grading |
| 3rd Term                            | <b>3rd</b>      | Third Term grading  |
| All year (Elem/JHS only)            | <b>N/A</b>      | Every term          |

**Why it matters:** A class you tag as **2nd** Term will not appear in the teachers' grading list or the students' LMS during the 1st Term — it appears automatically when the 2nd Term becomes the current term. This keeps each term's classes clean and separate.

**This only affects Senior High.** Elementary and Junior High subjects use "N/A" and continue to run all year — nothing changes for them.

## The overall flow

Repeat "Create Subject → Create Class" for each Term (1st, 2nd, 3rd) as the school year progresses.

## 2 · Open the Management screen

### 1 Log in as the SHS Head

Go to the school system and sign in with your Department-Head account.

A screenshot of a web browser window showing the ITFA Staff Login page. The browser's address bar displays 'itfa.edu.ph/enrollment/login.php'. The page has a light gray background. In the center, there is a white rounded rectangle containing a graduation cap icon at the top, followed by the text 'ITFA — Staff Login'. Below this, there are two input fields: 'Username' with the text 'shs.head' and 'Password' with masked characters '.....'. At the bottom of the white box is a green button with the text 'Sign In →'.

Figure 1 — Signing in with your SHS Head account.

### 2 Open “Manage”

From the Department-Head dashboard, open **Manage**. You'll see a row of tabs across the top:

A screenshot of a web browser window showing the Department Head Management screen. The browser's address bar displays 'itfa.edu.ph/enrollment/depthead/manage.php'. The page has a light gray background. At the top, there is a green header bar with the text 'DEPARTMENT HEAD · MANAGEMENT' and 'Academic Setup' below it. Below the header, there is a row of tabs: 'Semester', 'Grade Level', 'Cluster', 'Sections', 'Subjects' (which is highlighted with an orange circle and the letter 'A'), 'Teachers', and 'Classes'. Below the tabs, there is a white rounded rectangle containing the text: 'The table for the selected tab appears here, with an + Add button on the right.'

Figure 2 — The Manage tabs. You'll mainly use **Subjects**  and **Classes**.

### 3 · Create the SHS Subject

Do this for each subject offered in a Term. Example: creating “Oral Communication” for Grade 11, **1st Term**.

#### 3 Subjects tab → “+ Add”, then fill the form

... Subjects Classes + Add Subject

**Add Subject**

Subject Name \*  
Oral Communication

Grade Level \*  
Grade 11

Cluster / Strand  
STEM

**B Semester = TERM \***  
1st (1st Term)

Subject Code  
ORAL-COMM

Max Capacity  
50

Cancel Save Subject

Figure 3 — Creating a subject. The **Semester** field **B** is the Term — pick **1st** / **2nd** / **3rd**.

**The one field that decides the Term:** the **Semester** dropdown. Choose **1st** for a 1st-Term subject, **2nd** for 2nd Term, **3rd** for 3rd Term. (Never pick “N/A” for SHS — that makes it a whole-year subject.)

#### Repeat for every subject in the Term

Add all the subjects that belong to that Term (e.g., all Grade 11 1st-Term subjects). To set up the 2nd Term later, add those subjects again with Semester = **2nd**.

## 4 · Create the Class (subject + section + teacher)

A "Class" connects a Subject to a Section, a Teacher, and a schedule — for one Term.

### 4 Classes tab → "+ Add", then fill the form

.../manage.php?tab=class

Subjects **Classes** **+ Add Class**

**Add Class**

School Year: 2026-2027

**C Semester (Term)**: 1st (1st Term)

Cluster / Strand: STEM

Grade Level: Grade 11

Section: EBRAHIM

**D Subject**: Oral Communication

**E Teacher**: Juan D. Cruz, LPT

Time / Schedule: 8:00 AM-9:00 AM (M-T-W)

Status: Open

Cancel Save Class

Figure 4 — Creating a class. Match the **Semester (Term)** **C** to the subject's Term, then pick the **Subject** **D** and **Teacher** **E** .

**Keep the Term consistent.** The class's **Semester** **C** must match the subject's Term. A 1st-Term subject goes into a 1st-Term class. If they don't match, the class may not appear in the right term.

### 5 Save — the teacher is now assigned

After saving, the class shows in the Classes table. The assigned teacher will see it in their **My Classes** and can encode grades — but only when that Term is the current term.

## 5 · Verify & how Terms appear

### 6 Check that it shows in the correct Term

Open the teacher's **My Classes** (or the LMS). At the top is the **Term** selector. The new class appears only under its own Term.

Figure 5 — The Term selector. A 1st-Term class shows under “First Term”; 2nd/3rd-Term classes appear when those terms are selected.

## 6 · Quick reference & FAQ

| TO DO THIS...                   | DO THIS                                                     |
|---------------------------------|-------------------------------------------------------------|
| Add a 1st-Term subject/class    | Set <b>Semester = 1st</b> on both the Subject and the Class |
| Add a 2nd-Term subject/class    | Set <b>Semester = 2nd</b> on both                           |
| Add a 3rd-Term subject/class    | Set <b>Semester = 3rd</b> on both                           |
| A whole-year subject (Elem/JHS) | Set <b>Semester = N/A</b> (not for SHS)                     |

### FAQ

**Q: My 2nd-Term class doesn't show yet — is it broken?**

No. It appears when the **Second Term** becomes the current term. You can preview it by switching the Term selector.

**Q: Do I recreate subjects each term?**

Yes — for SHS, add the subjects for each Term (they change per term). Create the matching classes for that Term.

**Q: Will this affect Elementary/JHS?**

No. They use “N/A” and run all year, exactly as before.

**Q: Who advances the current Term?**

The current Term follows the active grading period. When the school moves from 1st to 2nd Term, the 2nd-Term classes automatically become visible.

**Golden rule:** the **Semester** field = the **Term**. Pick it correctly on both the Subject and the Class, and everything lines up automatically.
