Back Accounts

Cashier User Manual

A complete, step-by-step guide to recording a student's unpaid balance from a previous school year, collecting payment against it, issuing an Official Receipt, and understanding how it appears on the Statement of Account.

I-SMS · CASHIER MODULE

1 What is a Back Account?

A **back account** is money a student still owes from a **previous school year**. It is separate from this year's tuition and fees. This module lets the Cashier record that old debt against the student, collect it (in full or partially), and issue a receipt.

The one rule to remember

A back account is a **warning** on the Statement of Account — it is **never added** to the SOA's total due. This year's bill stays this year's bill. The old debt is shown so the student knows to settle it, but it does not change the monthly amount they are being billed.

Why it is tied to the student, not the enrolment

The back account is linked to the **student**. That means it follows them from year to year. A debt from S.Y. 2023-2024 will keep appearing on their SOA in 2026-2027, and every year after, until it is paid or cancelled.

The four statuses

Status	What it means	Shows on the SOA?
Unpaid	Recorded, nothing paid yet.	Yes — full amount
Partial	Some payment received, a balance remains.	Yes — remaining balance
Paid	Fully settled. Balance is zero.	No — it disappears
Cancelled	Written off or entered in error. Record kept for audit.	No — it disappears

Status is automatic

You never set the status by hand. The system moves it **Unpaid** → **Partial** → **Paid** as payments come in, and back again if a payment is voided.

Where the existing records came from

All **491** historical back-account records from S.Y. 2023-2024 were already imported into this module, including **351 unpaid accounts**. They are searchable from day one — you do not need to re-enter them. You only record a back account manually for a debt the system does not already know about.

2 Opening the Module

- 1 Log in to I-SMS with your Cashier account.
- 2 In the left sidebar, open [Collections](#) → [Back Accounts](#) .
Only Cashier and Super Admin users can see this menu.

The four counters at the top

Counter	Meaning
Outstanding	Total pesos still owed across every unpaid and partial back account. This is your collection target.
Unpaid Accounts	How many students still owe something.
Collected	Total pesos already collected through this module.
Total Records	Every back account on file, including paid and cancelled ones.

Finding a record

Use the **Search** box in the list to look up a student by **name, LRN, or student ID**. Use the **Status** dropdown to show only Unpaid, Partial, Paid, or Cancelled records. Click **Filter** to apply, or **Clear** to reset.

Back Accounts — list						
Student	S.Y.	Original	Paid	Balance	Status	Actions
ABBAS, NADIA M. LRN 131260120413	2023-2024	3,390.00	0.00	3,390.00	Unpaid	Collect • Edit • Cancel
ABBAS, AMIR A. LRN 476515150171	2023-2024	2,500.00	1,000.00	1,500.00	Partial	Collect • Edit
ABAS, ABDULAZIS E. LRN 8258656967001	2023-2024	760.00	760.00	0.00	Paid	View • Edit

Reading the list

Unpaid and partial accounts are always pushed to the **top** of the list, largest balance first — so the students who owe the most are the first thing you see.

3 Task 1 — Record a Back Account

Use this when a student has an old unpaid balance that is not yet in the system.

1 Open the Record a Back Account panel.

It is open by default at the top of the page.

2 Find the student.

Type at least **2 characters** of their surname or LRN. A list appears as you type. Use the **↑ / ↓ arrow keys** to move through the results and press **Enter** to select — or just click the name.

3 Confirm the right student is picked.

Their name, LRN and last enrolled school year appear in a blue box. If it is the wrong person, click **change** and search again.

4 Enter the S.Y. of the debt.

The school year the money was owed *from* — for example **2023-2024**. **Not** the current year. Pick from the dropdown or type it.

5 Enter the Amount.

The full amount owed, in pesos. Must be greater than zero.

6 Optionally add Grade & Section and Remarks.

Remarks are free text — use them to explain the debt, e.g. *"unpaid tuition balance carried from S.Y. 2023-2024"*. This helps whoever reads the record later.

7 Click .

The record is created as **Unpaid** and you are taken straight to it, ready to collect.

 **Record a Back Account**

STUDENT *

Type an LRN or name, then pick from the list...

ABBAS, NADIA · LRN 131260120413 · last enrolled 2026-2027 **change**

S.Y. OF THE DEBT *

2023-2024

AMOUNT (₱) *

3,390.00

REMARKS (OPTIONAL)

unpaid tuition balance carried from S.Y. 2023-2024

Save Back Account

If the student does not appear in the search

Only students with an enrolment record can be selected — that link is what makes the warning show on their SOA. If a student is genuinely missing, they must be enrolled/registered first. Try searching by **surname** or by the **full LRN** before assuming they are absent.

4 Task 2 — Collect a Payment

This is the main daily task: taking money against an old balance and issuing the receipt.

1 **Find the student** in the list and click **Collect**.

2 **Check the three boxes: Original, Paid, Balance.**

Confirm the balance matches what the payer expects before taking money.

3 **Enter the Amount to collect.**

It defaults to the **full remaining balance**. If the student is paying only part of it, type the smaller amount — **partial payments are allowed**.

4 **Choose the Method.**

Cash, GCash, Maya, Bank, or Check.

5 **Enter a Reference # if not cash.**

Optional, but strongly recommended for GCash / Maya / Bank / Check so the payment can be traced later.

6 Click **Collect & Print OR** and confirm.

The receipt opens automatically and the print dialog appears. The balance updates immediately.

Collect payment	Official Receipt (A5)
AMOUNT TO COLLECT (₱) 3,390.00 METHOD Cash REFERENCE # (OPTIONAL) Collect & Print OR	IBN TAIMIYAH FOUNDATION ACADEMY, INC. OFFICIAL RECEIPT BACK ACCOUNT PAYMENT No. OR-2026-000001 Received from: ABBAS, NADIA Back Account — S.Y. 2023-2024 ₱3,390.00 FULLY SETTLED ₱0.00

The receipt tells the student where they stand

Every back-account OR shows a box at the bottom: either **FULLY SETTLED** in green, or the **Remaining back-account balance** in red. The student leaves the counter knowing exactly what is left.

It counts toward your day

Back-account collections automatically join the day's totals, so they are included in your **End-of-Day Close** and the **Collection Report**. You do not record them anywhere else.

5 Task 3 — Reprint or Void a Payment

Every payment ever taken is listed under **Payment History** on the student's back-account screen.

Reprinting a receipt

- 1 **Open the student's record** (click **Collect** or **View**).
- 2 **In Payment History, click **Reprint**** on the payment you need.
The original receipt opens with the same OR number. Reprinting does not create a new receipt or a new number.

Voiding a payment

Void a payment only when it was recorded in error — wrong amount, wrong student, or a cancelled transaction.

- 1 **In Payment History, click **Void**** on that payment.
- 2 **Confirm.**
The payment is struck through and marked **Voided**. The student's balance is **restored**, the status rolls back (e.g. **Paid** → **Partial**), and the amount is **removed from the day's collection totals**.

Payment History					
Date	OR #	Method	Amount	Status	Action
Jul 17, 2026 9:14am	OR-2026-000002	GCash · REF88213	₱1,500.00	Paid	Reprint · Void
Jul 16, 2026 3:02pm	OR-2026-000001	Cash	₱500.00	Voided	—

A void is permanent and recorded

A voided payment cannot be un-voided, and the voided receipt is stamped **VOID** when printed. Every void is written to the audit log with your name, the date, and the amount. If you voided by mistake, simply collect the payment again — a new OR number will be issued.

6 Task 4 — Correct or Cancel a Record

Editing an amount

Use **Edit** if the recorded amount, school year, section or remarks were wrong.

- 1 Click **Edit** on the row.
- 2 Change the values and click **Save**.

The balance and status are recalculated automatically from the payments already made.

You cannot set the amount lower than what was already paid

If a student has paid ₱1,000, the amount cannot be edited below ₱1,000 — the system will refuse and tell you why. This protects the receipts you have already issued. Void the payments first if you truly need to go lower.

Cancelling a back account

Use **Cancel** when the debt should not be collected at all — it was entered by mistake, or management has written it off.

- 1 Click **Cancel** on the row and confirm.
- 2 The record becomes **Cancelled**.

Its balance drops to zero and it **stops appearing on the student's SOA**. The record itself is kept for audit — nothing is deleted.

Cancel is blocked once money has been received

The **Cancel** option disappears as soon as a payment exists on the account. This is deliberate: you cannot erase a debt the school has already collected against. Void the payments first, then cancel.

Quick decision guide

Situation	What to do
Wrong amount typed, no payment yet	Edit the amount.
Wrong amount, payment already taken	Void the payment, then Edit , then collect again.
Debt does not exist / entered twice	Cancel the record.
Attached to the wrong student	Cancel it, then record it again on the correct student.
Management wrote off the debt	Cancel , and state the reason in Remarks first.

7 How It Appears on the SOA

Once a back account is **Unpaid** or **Partial**, it appears automatically wherever that student's Statement of Account is shown. You do not need to do anything.

On the printed SOA slip

STATEMENT OF ACCOUNT — S.Y. 2026-2027	
ABBAS, NADIA M. · Grade 10 — Zainab	
Tuition Fee (Month 1)	1,200.00
Miscellaneous Fee	400.00
School Improvement Fee	233.50
Total Amount to be Paid for this month	₱1,833.50
⚠ UNPAID BACK ACCOUNT: ₱3,390.00 — S.Y. 2023-2024 (not included in the total above — please settle at the Cashier)	
"NO PERMIT NO EXAM"	

Notice what the total says

The month's total is **₱1,833.50** — *not* ₱5,223.50. The ₱3,390 back account is printed as a warning underneath and is deliberately excluded from the amount being billed this month. If a parent asks "why isn't the old balance in my total?", this is the answer: it is billed separately at the Cashier, not through the monthly SOA.

On the Student Portal

The student sees an amber warning panel above their Statement of Account:

⚠ You have an unpaid back account from a previous school year.
Total outstanding back account: ₱3,390.00 — this is <i>separate</i> from this year's balance below. Please settle it at the Cashier's office.
S.Y. 2023-2024 ₱3,390.00 Unpaid

When does it disappear?

The warning stops showing when...	Status becomes
The balance reaches zero — the student paid in full	Paid
The Cashier cancels the record	Cancelled

A **partial** payment does not remove the warning — it reduces the amount shown to the remaining balance.

8 Rules & Troubleshooting

Rules the system enforces for you

If you try to...	The system will...
Collect more than the remaining balance	Refuse, and show the exact balance allowed.
Collect on a fully paid account	Refuse — "already fully paid".
Collect on a cancelled account	Refuse.
Edit the amount below what was already paid	Refuse, and name the amount already paid.
Cancel an account that has payments	Hide the Cancel option — void the payments first.
Save without picking a student	Refuse — "select a student first".
Save a zero or negative amount	Refuse.
Void the same payment twice	Refuse — "already voided".

Common questions

Question / problem	Answer
"Back-account tables not installed"	The database migration has not been run on this server. Contact your I-SMS administrator — they must run <code>migrations/student_back_accounts.sql</code> .
The student search finds nothing	Type at least 2 characters. Try the surname alone, or the full LRN . Only students with an enrolment record can be selected.
I recorded it on the wrong student	Cancel the record and re-record it on the correct student. If you already collected, void the payment first.
The old balance is not on the SOA	Check the status — only Unpaid and Partial show. Also confirm the record is on the same student who is enrolled this year.
Should I add the back account to the SOA total?	No . The system deliberately keeps them separate. Collect back accounts here, in this module.
Do these payments count in my End-of-Day?	Yes — automatically, including voids, which subtract.
Can a student pay in instalments?	Yes. Collect any amount up to the balance, as many times as needed. Each payment gets its own OR.
Can I delete a back account?	No — use Cancel . Records are never deleted, so the audit trail stays intact.

Everything you do here is logged

Creating, editing, cancelling, collecting and voiding all write an audit entry with your name and the time. Work confidently — but know that the record is permanent.
